

Massive infrastructure projects to be unleashed in Ditsobotla

LICHTENBURG: Ditsobotla local municipality will unleash five massive projects in a bid to improve the road infrastructure and accelerate service delivery in various townships. Places that will benefit from these infrastructure projects are Itsoseng, Itekeng, Boikhutso, Bakerville and Tlhabologang. Construction work is supposed to commence before the end of February 2015 and all projects are to run concurrently in the identified places.

The projects are funded from MIG budget and will be implemented within the 2014/2015 financial year. The infrastructure projects will entail the paving of the roads and installation of storm water drainage system. The massive infrastructure development will boast and revitalize the local economy with jobs creation and transferring of skills to the local people.

Ward councillors of places where these project will be rolled out, are in consultation with their respective constituencies to keep them abreast of the service delivery orientated initiatives from the local municipality. Ward councillors should also collaborate with their communities to identify projects steering committees that will assist with the smooth running of these projects.
