 1. He gives notice that he is not able to perform in accordance with his tender; or
 2. Fails to sign the Tender or to submit the required Bond; or

F2.17 Clarification of tender offer after submission

The original Tender as amended or corrected in writing (if required) will be accepted as the Tenderer's offer. The employer may request additional information from any Tenderer about his Tender. F3.4 Opening of Tender Submissions

F3.8 Test for responsiveness

The employer or his representative will determine after opening and before detail evaluation whether each tender offer received:

- 1. Complies with the requirements of these Conditions of Tender in terms of Eligibility
- 2. Has been properly and fully completed and signed,
- 3. And is responsive to the other requirements of the tender document

A responsive tender is one that conforms to all the terms, conditions and specifications of the tender documents without material deviations or qualifications. A material deviation or qualification is one which, in the opinion of the employer or his representative, would:

- Detrimentially affect the scope, quality or performance of the works, services or supply identified in the Scope of Work
- Significantly change the Employers of the tenderer's risks and responsibilities under the contract, or
- Affect the competitive position of the other tenderers presenting responsive tenders, if it were to be rectify.

F3.9 Arithmetical errors, omissions and discrepancies

The Employer reserves the right to correct any arithmetical or other errors in the calculation of the Tender amount.

The Tenderer will be notified accordingly prior to his tender being accepted. Under no circumstances will the unit rates be adjusted. Where any discrepancy exists between the unit price and the extended total against any item, the discrepancy will be adjusted by altering the total amount filled in against such item and consequently the total tendered sum

In the event of there being any rate or rates which are declared to be unacceptable by the Employer for reasons which the Employer will indicate, the tenderer will be requested to –

- a) Justify any specific rate or rates, i.e. to give a financial breakdown of how such rate or rates were obtained, and subsequently
- b) Consider amending and adjusting such rate or rates. It must be understood that in the event of the Tenderer refusing to adjust any rate or rates to the satisfaction of the Employer such refusal may prejudice his Tender.
- c) Where there is a discrepancy between the amounts in figures and in words, the amount in words shall govern.

Consider the rejection of a tender offer if the tenderer does not correct or accept the correction of his arithmetical errors in the manner described above.

F3.11 Evaluation of tender Offers

Tender offers will be evaluated on Method 4: Financial Offer, Quality and Preferences

Method 4: Financial offer, quality & preferences	1)	Score quality, rejecting all tender offers that fail to score the minimum number of points for quality stated in the Tender Data.

	3)	Confirm that tenderers are eligible for the preferences claimed, and if so, score tender evaluation points for referencing.
	4)	Calculate total tender evaluation points.
	5)	Rank tender offers from the highest number of tender evaluation points to the lowest.
	6)	Recommend tenderer with the highest number of tender evaluation points for the award of the contract, unless there are compelling and justifiable reasons not to do so.

		<p>$Y = 10$</p> <p>If V is negative and its absolute value exceeds Nn, then V shall be taken as equal to minus Nn.</p> <p>The total extension of time shall be the algebraic sum of the monthly totals for the period of construction, but if the grand total is negative the time for completion shall not be reduced due to abnormal low rainfall. Extensions of time for part of a month shall be calculated using pro rata values of Nn and Rn.</p> <p>The factor $(Nw - Nn)$ shall be considered to represent a fair allowance for variations from the average number of days during which rainfall exceeds Ymm.</p> <p>The factor $\frac{Rw - Rn}{x}$ shall be considered to represent a fair allowance for variations from the average in the number of days during which rainfall had not exceeded Ymm, but wet conditions had prevented or had disrupted work. The formula does not consider flood damage which could cause further or concurrent delays, and which should be treated separately as far as extension of time is concerned.</p> <p>Accurate rain gauging shall be taken at a suitable point on Site. This information shall be regarded as the actual rainfall for this contract. C2.2 SCHEDULE OF QUANTITIES
PREAMBLE TO SCHEDULE OF QUANTITIES

- 1.0 The general conditions of contract, the special conditions of contract (if any), the specifications (including the project specification) and the drawings (if any) are to be read in conjunction with the schedule of quantities.
- 1.1 **Those parts of the contract to be constructed using labour-intensive methods have been marked in the bill of quantities with the letters LI in a separate column filled in against every item so designated. The works, or parts of the works so designated are to be constructed using labour-intensive methods only. The use of plant to provide such works, other than plant specifically provided for in the scope of work, is a variation to the contract. The items marked with the letters LI are not necessarily an exhaustive list of all the activities which must be done by hand, and this clause does not over-ride any of the requirements in the generic labor-intensive specification in the Scope of Works.**
- 1.2 **Payment for items which are designated to be constructed labour-intensively (either in this schedule or in the Scope of Works) will not be made unless they are constructed using labour-intensive methods. Any unauthorised use of plant to carry out work which was to be done labour-intensively will not be condoned and any works so constructed will not be certified for payment.**
- 2.0 For the purposes of this schedule of quantities, the following words shall have the meaning hereby assigned to them:
- Unit: The unit of measurement for each item of work as defined in the specifications.
- Quantity: The number of units of work for each item.
- Rate: The payment per unit of work for which the tenderer tenders to do the work.
- Amount: An amount tendered for an item, the extent of which is described in the schedule of quantities, the specification or elsewhere, but of which the quantity of work is not measured in units.
- “LI” Labour Intensive methods to be used in accordance with Project Specifications**
- 3.0 The quantities set out in the schedule of quantities are only approximate quantities. The quantities of work finally accepted and certified for payment, and not the quantities given in the schedule of quantities, will be used to determine payments to the contractor.
- The validity of the contract shall in no way be affected by differences between the quantities in the schedule of quantities and the quantities finally certified for payment. Work shall be valued at the rates or lump sums tendered, subject only to the provisions of the general conditions of contract.
- 4.0 Rates and lump sums shall include full compensation for overheads, profits, incidentals, tax (**except for Value Added Tax**), etc. and for the completed items of work as specified. Full compensation for completing and maintaining, during the maintenance period, all work shown on the drawings and

specified in the specifications, and for all the risk, obligations and responsibilities specified in the general conditions of contract, special conditions of contract and the project specifications shall be considered as provided for collectively in the items of payment given in the schedule of quantities, except in so far as the quantities given in the schedule of quantities are only approximate.

- 5.0 The tenderer shall fill in a rate or a lump sum for each item where provision is made for it, - this includes rate only items. Items against which no rate or lump sum has been entered in the tender will not be paid for when the work is executed, as payment for such work will be regarded as being covered by other rates or lump sums in the schedule of quantities.

Please only complete rates and totals for those items that have entries in the quantity column – this includes “rate only” items

The tenderer shall fill in a rate against all items where the words "rate only" appears in the amount column. Although no work is foreseen under such item and no quantities are consequently given in the quantity column, the tendered rate shall apply should work under this item actually be required. Tenderers should note the provisions of paragraph 12 of this preamble.

If the tenderer should group a number of items together and tender one lump sum for such group of items and not to each individual item, or should he indicate that full compensation for any item has been included in the rate for another item, the rate for the item included in another item shall be deemed to be nil.

The tendered lump sum and rates shall be valid irrespective of any change in the quantities during the execution of the contract.

Preliminary & General Section may not be tendered as a lump sum. A tender may be disqualified if the P&G Section is tendered as a lump sum.

- 6.0 The works executed are measured for payment in accordance with the methods described in the contract documents under the various payment items.
- 7.0 The amount of work or the quantities of material stated in the schedule of quantities shall not be considered as restricting or extending the amount of work to be done or the quantity of material to be supplied by the contractor.
- 8.0 The statement of quantities of material or amount of work in the schedule of quantities shall not be regarded as authorisation for the contractor to order material or to execute the work. The contractor shall obtain the Principal Agent's detailed instructions for all work before ordering any materials or executing work or planning in this regard.
- 9.0 The short description of the payment items in the schedule of quantities is only given to identify the items and to provide specific details. Reference shall inter alia be made to the drawings, project specifications, general conditions of contract and special conditions of contract for more detailed information regarding the extent of work entitled under each item.

DITSOBOTLA MUNICIPALITY
TENDER NO: MIG/NW/2845/CF/24/25
TENDER: CONSTRUCTION OF COMMUNITY HALL IN ITEKENG (RE-ADVERT)
MINIMUM REQUIREMENTS

- 10.0 The provisions of Clause 48 of the general conditions of contract shall apply to provisional sums and prime cost sums.
- 11.0 Subject to the conditions stated in paragraph 12 below, the rates and lump sums filled in by the tenderer in the schedule of quantities shall be final and binding and may not be adjusted should there be any mistakes in the extensions thereof and in the amounts, appearing in the tender. Should there be any discrepancies between the tender sum and the correctly extended and totaled schedule of quantities, the rates will be regarded as being correct, and the employer shall have the right to adjust the tender sum to reconcile the tender sum with the total of the schedule of quantities. Under no circumstances will tendered rates be adjusted when such errors are corrected. In such an event the contractor will be consulted but, failing agreement between the parties, the decision of the employer shall be final and binding. Adjustment of the tender sum will take place only after acceptance of the tender, but prior to the signing of the contract. In their own interest tenderers must make doubly sure of the correctness of their tendered rates, the extensions, and the tender sum.
- 12.0 A tender may be rejected if the unit rates or lump sums for some of the items in the schedule of quantities are, in the opinion of the employer, unreasonable or out of proportion, and if the tenderer fails, within a period of seven (7) days of having been notified in writing by the employer to adjust the unit rates or lump sums for such items, to make such adjustments.

- 13.0 The units of measurement indicated in the schedule of quantities are metric units. The following abbreviations are used in the schedule of quantities:

mm	=	millimeter	kl	=	kilolitre
m	=	metre	kg	=	kilogram
km	=	kilometer	t	=	ton (1 000 kg)
m ²	=	square metre	No	=	number
ha	=	hectare	%	=	per cent
m ³	=	cubic metre	P C sum	=	prime cost sum
l	=	litre	prov sum	=	provisional sum
mm	=	millimeter	kl	=	kilolitre

- 14.0 All rates and sums of money quoted in the schedule of quantities shall be in Rands and whole cents. Fractions of a cent shall be discarded.
- 15.0 The schedule of quantities shall be completed in **BLACK INK. Tenders where the Schedule of Quantities is completed in pencil, or use of correction fluid, WILL be disqualified.**
- 16.0 All prices and rates shall exclude value added tax (VAT). **The Tenderer shall calculate VAT and enter it as the end of the Summary of the Schedule of Quantities**
